

**Approval Process Information**

The Jump Start wizard creates a one-step approval process for you in just a few minutes.

Enter a name for your process in the box below and then select an email template to notify the approver (optional).

Name	<input type="text"/>	
Unique Name	<input type="text"/> ⓘ	Use Approver Field of Lead Owner <input type="checkbox"/>
Approval Assignment Email Template	<input type="text"/> ⓘ	

Add the Submit for Approval button and Approval History related list to all Lead page layouts ☒ ⓘ

---

**Specify Entry Criteria**

Use this approval process if the following criteria are met :

Field	Operator	Value	
--None--	--None--	<input type="text"/>	AND
--None--	--None--	<input type="text"/>	AND
--None--	--None--	<input type="text"/>	AND
--None--	--None--	<input type="text"/>	AND
--None--	--None--	<input type="text"/>

New Custom Field

Step 1. Choose the field type

Specify the type of information that the custom field will contain.

Data Type	
<input type="radio"/> None Selected	Select one of the data types below.
<input type="radio"/> Auto Number	A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
<input type="radio"/> Formula	A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
<input type="radio"/> Roll-Up Summary	A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
<input type="radio"/> Lookup Relationship	Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
<input type="radio"/> Master-Detail Relationship	Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where: <ul style="list-style-type: none"><li>The relationship field is required on all detail records.</li><li>The ownership and sharing of a detail record are determined by the master record.</li><li>When a user deletes the master record, all detail records are deleted.</li><li>You can create rollup summary fields on the master record to summarize the detail records.</li></ul> The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.
<input type="radio"/> External Lookup Relationship	Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
<input type="radio"/> Checkbox	Allows users to select a True (checked) or False (unchecked) value.

Tabs

## Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Submission Summary

PrintEmail

Conference Name	International Conference on Computing and Intelligent Reality Technologies
Paper ID	596
Paper Title	Comprehensive Social Media Threat Detection with Integrated OCR and NLP
Abstract	<p>The rapid growth of social media has amplified the proliferation of harmful content, including threats, hate speech, and child exploitation material. Traditional text-based monitoring approaches often fail to capture the full scope of these threats, as malicious actors increasingly leverage visual content, such as images and videos, to convey their messages. This paper presents a comprehensive framework that integrates Optical Character Recognition (OCR) and Natural Language Processing (NLP) to address the limitations of existing social media threat detection systems.</p> <p>By leveraging advanced OCR techniques, the proposed system can extract and analyze text embedded within visual media, enabling the detection of threats that would otherwise be missed by text-only analysis. The NLP module then employs sophisticated algorithms, including sentiment analysis, keyword spotting, and machine learning classifiers, to categorize the extracted text and identify potentially harmful content. This multimodal approach, combining textual and visual analysis, provides a more robust and accurate mechanism for monitoring social media platforms and safeguarding online communities.</p> <p>Keywords: Social Media Monitoring, Threat detection, Optical Character Recognition (OCR), Natural Language Processing (NLP), Processing visuals, Hate speech and Child exploitation</p>

## SETUP

### New Custom Object

Context-Sensitive Help Setting

☒ Open the standard Salesforce.com Help & Training window

☐ Open a window using a Visualforce page

Content Name

--None--

#### Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name

Project ID

Example: Account Name

Data Type

Auto Number

Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Display Format

Proj-{0000}

Example: A-{0000} [What Is This?](#)

Starting Number

1

#### Optional Features

- ☐ Allow Reports
- ☐ Allow Activities
- ☐ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing [i](#)

#### Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access
